

Site Admin Quick Start Guide

The Summit Test Delivery System Flow

The Summit Test Delivery System requires minimal setup to begin delivering tests. The diagram below shows the flow. It all starts with the Site Administrator. This start up guide covers the Site Admin portion of the flow.

TEST ADMINISTRATION FLOW

Import Students

New students can be loaded to the master school student list by importing a comma separated value (CSV) file that contains the following fields: StateID, FirstName, LastName. The batch import should only be used after the site administrator has verified that the state IDs are complete for all previously entered students. Failure to do so can result in the duplication of students.

On the School Administrator Screen, scroll to the bottom:

Site Admin Quick Start Guide

The screenshot shows the Site Admin interface with several sections:

- Pending Assignments:** A table with columns: First, Last, User Name, Role, Status, As of. It contains two rows, each with a "Cancel Assignment" button.
- Instructors:** A section with an "Add Instructor" button.
- Proctors:** A section with an "Add Proctor" button.
- Completed Assignments:** A section with a "View History" button.
- Export School Report:** A section with a "Select Test Window" dropdown menu (currently showing "Select One...") and a "Generate Report for the Selected Test Window" button.
- Student List:** A section with two buttons: "View Student List" and "Batch Import Students". This section is highlighted with a red box.

Select View Student List to see a list of students for your school, Batch Import Students takes you to the batch import screen:

User Manual

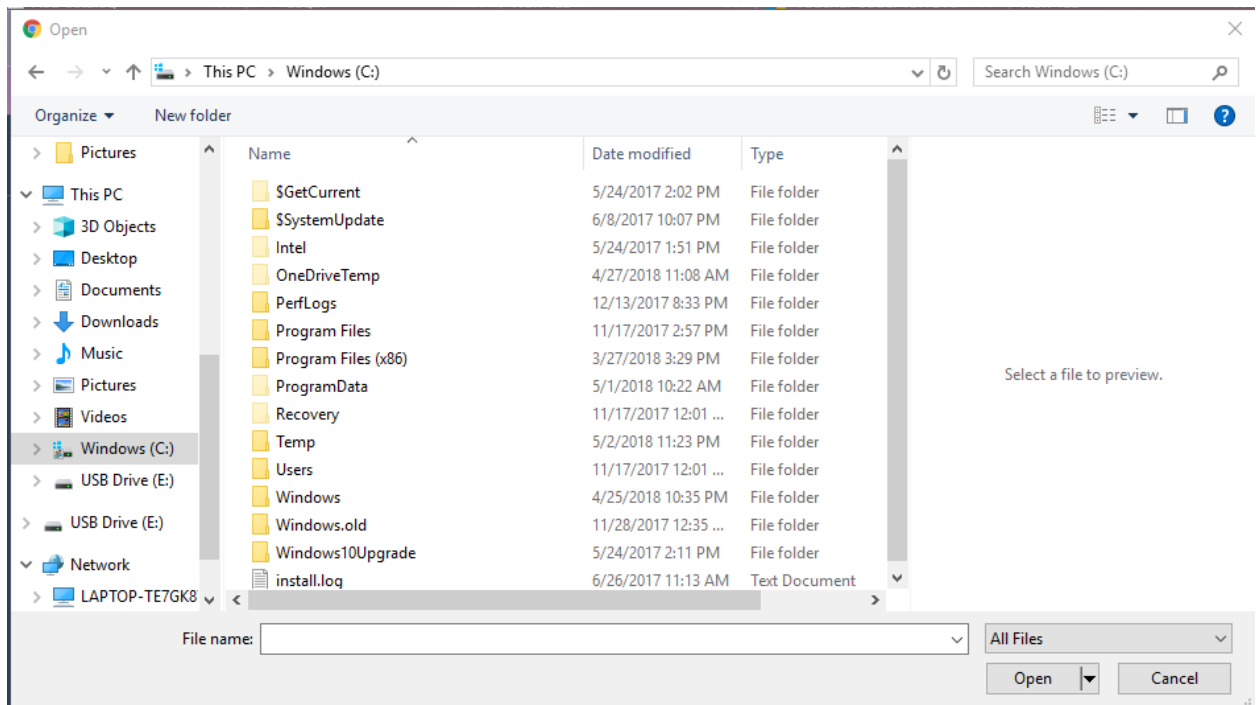

The screenshot shows the "Summit Test (ZZ)" page with the following content:

- Section: School Administration
- Text: "The file format should be .csv. Please make sure that there are no extraneous commas, and no other punctuation in the file other than the ones shown. This includes quotation marks, periods, and all other punctuation. Refer to the picture to the right for an example of what a .csv file looks like."
- Text: "Be sure to note: There must be NO commas at the end of the line. If you have a header line, it must be formatted exactly like the one to the right to ensure it is not imported as a student. Each line represents one and only one student. Finally, double check the file is saved as a .csv file."
- Buttons: "Choose File" (with "No file chosen" text), "Import File"
- Image: A screenshot of a Windows file dialog box showing a CSV file with the following content:

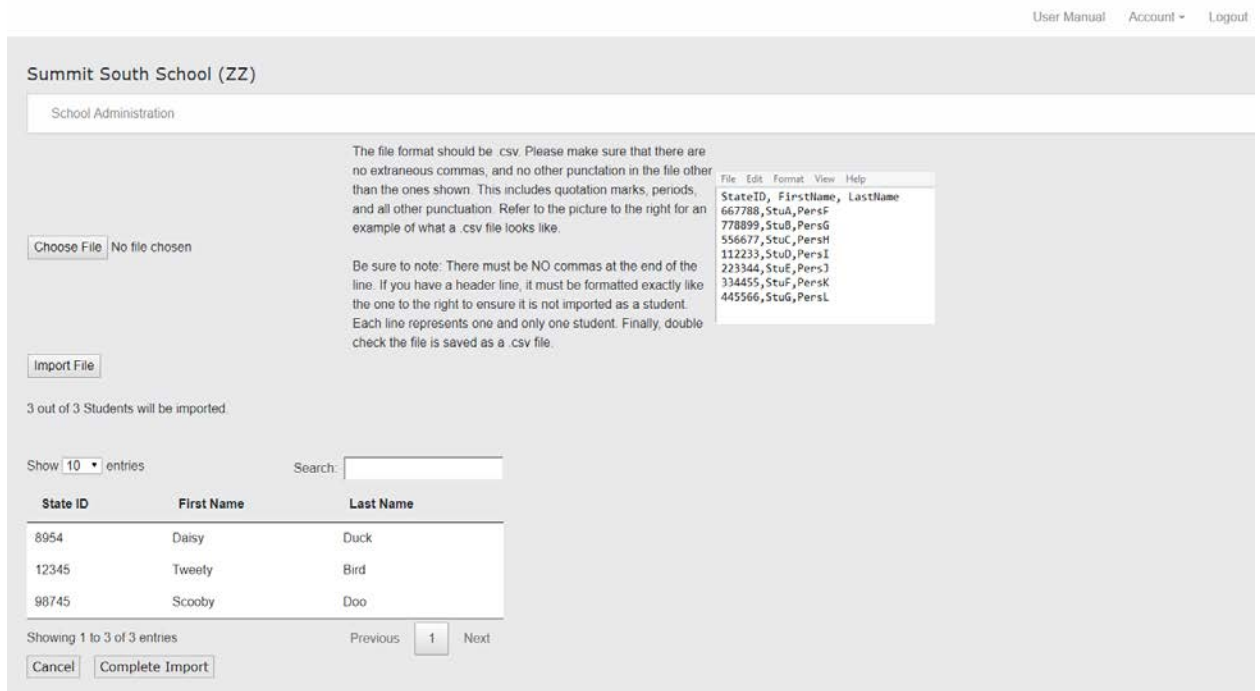

```
File Edit Format View Help
StateID, FirstName, LastName
667788, StuA, PersF
778899, StuB, PersG
556677, StuC, PersH
112233, StuD, PersI
223344, StuE, PersJ
334455, StuF, PersK
445566, StuG, PersL
```

Choose File brings up the windows file dialog box. Select the file you want to upload and click open:

Site Admin Quick Start Guide

Click Import File and a list of the students to import is displayed:

Click complete import and you will see a confirmation that your students were imported:

Summit South School (ZZ)

School Administration

Choose File No file chosen

Import File

3 out of 3 Students will be imported.

Please be sure to print a copy of this imported list, this will be the only time this list is displayed.

Student Daisy Duck (StateID: 8954) was imported successfully.
Student Tweety Bird (StateID: 12345) was imported successfully.
Student Scooby Doo (StateID: 98745) was imported successfully.
3 students were imported.

The file format should be .csv. Please make sure that there are no extraneous commas, and no other punctuation in the file other than the ones shown. This includes quotation marks, periods, and all other punctuation. Refer to the picture to the right for an example of what a .csv file looks like.

Be sure to note: There must be NO commas at the end of the line. If you have a header line, it must be formatted exactly like the one to the right to ensure it is not imported as a student. Each line represents one and only one student. Finally, double check the file is saved as a .csv file.

StateID	FirstName	LastName
667788	StuA	PersF
778899	StuB	PersG
556677	StuC	PersH
112233	StuD	PersI
223344	StuE	PersJ
334455	StuF	PersK
445566	StuG	PersL

Create Users

Click add instructor or add proctor and the add user screen is displayed:

School Administration

SELECT EXISTING USER

User Name:
